

# Ultima™

PREMIUM TOOL STEELS

**Boost Punching Productivity**

## **A New Benchmark For Durability & Performance**

### **Tool Steel for Longer Life**

When faced with demanding applications that require long-term wear resistance and toughness, turn to Wilson's new Ultima™ Premium Tool Steel for Wilson High Performance™ (HP) thick turret punches. Ultima premium steel punches are engineered to increase wear resistance by up to 100% over conventional tool steels.

### **A New Level of Performance**

Ultima premium tool steel sets a new benchmark for durability and performance. Ultima premium steel punches are designed to dramatically improve tool life when punching abrasive materials and materials with high tensile strength.

Ultima excels in applications in which punches wear quickly, and is ideal for long-run jobs. The premium steel, from which Ultima punches are made, significantly reduces micro chipping on the cutting edge. This micro chipping is most often where cutting edge failure begins.

### **Remarkable Downtime Reductions**

With up to twice as long between regrinds, Ultima premium steel punches significantly reduce downtime and tool replacement costs. Breaking, chipping, cracking, tool fatigue and other downtime problems are minimized, providing long-term gains in productivity and profitability.

Ultima premium steel punches are especially useful for the toughest punch press applications, but are effective in any job. Viability can be determined by conducting a cost-benefit analysis.
